Operational Review

In 2020, Magnit faced unprecedented challenges due to the Covid-19 pandemic and the Company reacted quickly to the rapidly changing environment and changing consumer behavior. Implementing rigorous health and safety measures, ensuring the availability of products, maintaining affordable pricing levels and continuing to deliver high levels of customer service were all crucial to attract new customers and remain the store of choice.

In 2020, Magnit focused on the operating efficiency of the existing store base and delivered solid LFL results and sales density growth. We achieved strong profitability improvements with EBITDA margin (IAS 17) up 1 p.p. year-on-year. Working capital improved significantly, with RUB 30.5 bln of cash released from working capital. Debt reduction became an area of focus due to the challenges brought by the pandemic and we reduced our leverage significantly. Achieving such strong results against this backdrop is an outstanding achievement.

Our business model once again demonstrated its resilience and ability to adapt. We saw a continuous inflow of new customers and a significant improvement in both customer satisfaction rates and NPS scoring. Magnit continued to adapt its formats, forming clusters based on specific customer trends prevalent in different localities, and launching new pilots including Magnit Metropolitan, Mya Tsena discounters, Mini Cosmetics stores and online offering. Progress was made in developing and improving operational structure and range, while enhancing category management.

We also leveraged our private label brand and own production capabilities, tailoring our logistics and supply chain based on demand and the specific requirements of different formats. The roll-out of our loyalty programme has provided us with a unique opportunity to gain a better understanding of our customers and tailor our range accordingly to better suit their needs. Magnit continues to implement its redesign programme, improve its e-commerce segment and continue with its digital transformation to support all departments with the relevant data and technologies.

Our operational efficiency is extremely important, along with the improvement of business processes. We managed to improve service levels and on-shelf availability of the new product range for our customers even at the time of increased demand. The overall supply chain remained robust throughout the year. Shrinkage level was decreased thanks to the efforts of the team to streamline cross-functional processes aimed at improvement of in-bound goods, faster delivery, accurate forecasting in collaboration with suppliers, etc. We also note substantial reduction in staff turnover, higher productivity of personnel and improvement in rent rates with landlords. As a result, costs remained under strict control, despite additional COVID-19-related expenses which totalled RUB 2.8 bln.

Due to the COVID-19 pandemic, CAPEX was lower than initially projected. This was mostly as a result of slower expansion and the delay of redesign projects during the lockdown period. In Q4 we resumed our expansion programme and opened 445 stores on a gross basis – more than in any quarter of 2020 and higher than in the previous year.

At the same time, we closed only 35 stores – the lowest number in any quarter of 2020. On the back of remarkable rise in returns per store, we go into 2021 with a solid foundation for growth, as we continue striving to deliver the best value for our shareholders.

Magnit continues to develop as an open and progressive business working for the benefit of all its stakeholders, including our employees, suppliers and communities. We made a significant step forward in formalising our approach to sustainability, with the announcement of our sustainability strategy setting out goals and commitments to be achieved by 2025.

Our success would have been impossible without the Magnit team and we strive to ensure Magnit remains an attractive and innovative employer. In 2020 we reviewed our incentive programme, improved our on-boarding procedure for new employees, and continued to develop our corporate academy.

Anti-COVID-19 measures and related costs:

- additional payments to frontline personnel
- purchases of sanitisers, thermometers, thermal imagers
- purchases of respirators, gloves and medical masks
- installation of screen protectors at the cash desks and special marking in the stores to ensure social distancing
- intensified cleaning
- zero mark up on several socially important product categories
- charity boxes, additional discounts to medical officers, elderly people and socially vulnerable citizens.

LFL sales growth in 2020 was well above CPI. Stores opened before 2018 were the main driver of the Company’s strong LFL performance. In Q4 2020 only 0.5% of Magnit's selling space was in the ramp-up phase with 94.5% already matured.

As noted above, measures against COVID-19 resulted in mobility restrictions, forcing consumers to stay in their homes, with an associated impact on their shopping habits. This resulted in a reduction in the frequency of visits, with a LFL traffic decline of -5.3% in 2020. This decrease in the number of visits was more than compensated by 14.2% growth in LFL average ticket, driven by increased spending per visit on a higher number of articles per basket, a trading up effect, lower promotional intensity and on-shelf inflation.

In 2020 Magnit signed the long-term lease agreements for 77 retail facilities previously occupied by stores operated by TD Interregio under the Family and Spar brands, and acquiring long-term leasehold rights for 189 Evrono, Yablochko, and Tvoy stores in Murmansk and the Murmansk region in the Northwestern Federal District. As for macroeconomic factors, Magnit’s results were impacted by further consolidation in the private sector, growing competition and a decline in consumers’ purchasing power.

Performance

In 2020, Magnit’s net retail sales reached RUB 1,510 bln. Despite a slowdown in the pace of new openings and the difficult macroeconomic situation, the Company delivered double-digit sales growth of 13.3% driven by a strong uplift in LFL sales of 7.4% and also by selling space growth of 3.6%. As a result, overall sales densities increased by 6.5% year-on-year as we saw customers responding positively to our product offering, customer service levels and pricing. We are actively gaining new customers and market share, reflected in our improved NPS scoring and LFL sales performance.

The lockdown measures imposed to control the pandemic distorted the structure of LFL sales – the frequency of visits fell, while the average ticket increased. Over time the frequency of visits started to recover, but LFL sales remained strong. We have closely monitored the effect of the pandemic on LFL sales and we calculate that it had a 2.8% positive impact in 2020. This indicates that most of the growth in LFL sales during 2020 was due to fundamental changes in the business unrelated to Covid-19 pandemic.

LFL sales growth in 2020 was well above CPI. Stores opened before 2018 were the main driver of the Company’s strong LFL performance. In Q4 2020 only 0.5% of Magnit’s selling space was in the ramp-up phase with 94.5% already matured.
Convenience stores

A convenience store with an average of 6,450 SKUs is aimed at everyday shopping with a large range of the most popular food and non-food products at attractive prices.

This format accounts for 77% of Magnit’s net retail sales in 2020. Here customers can buy fresh dairy products, fruits and vegetables, bread and dry foods, flour and confectionery products, or household chemicals spending the minimum time. Stores are located in cities, towns and more rural locations, which makes Magnit the largest and the most accessible retail chain in Russia in terms of geographical coverage.

The revenue for convenience stores in 2020 was RUB 1,161 bln, an increase of 13.8%. There were 14,911 Magnit convenience stores in Russia by the end of 2020. In 2020 Magnit focused on streamlining its portfolio of stores, disposing of 380 non-core stores and focusing on the most profitable locations. New store openings were slowed down due to the pandemic, but in Q4 Magnit opened 412 stores (net) – the highest number across all quarters of 2020 and higher than the previous year. In 2020, selling space grew by 2.8%. As a result, sales density of convenience food stores substantially improved by 6.2% year-on-year. 280 convenience stores were redesigned, bringing the share of convenience stores operating under the new concept up to 72%. LFL sales growth for 2020 reached 8.2%, an improvement of 1.3% compared to 2019.

LFL average ticket growth for the year was 15.2%, driven by volume increase, trading up effect and on-shelf inflation. The trading up effect was a result of less frequent but more expensive shopping changes in the product range, improved quality control.

Increased on-shelf inflation was a result of lower year-on-year promotional activity, overall food prices growth and local currency depreciation. LFL traffic went negative and stood at -6.1%; this decrease was an industry-wide trend due to the pandemic.

Convenience stores

13.8% year-on-year sales growth
14,911 stores
8.2% LFL sales growth
5,090 thous. sq. m of selling space
289 net store openings
8.2% sales density increase year-on-year

Magnit piloted three additional formats in 2020, which showed positive results.

Magnit City

Pilot stores were opened in Moscow and Krasnodar. The concept is for small stores with a cozy interior and a café, where visitors can grab a bite, take away any of the ready-to-eat offerings, or make other small purchases, as well as charge their smartphone and connect to Wi-Fi. Magnit City stores are located in high traffic spots with the total space of 120-180 sq. m and the range of up to 2,000 SKUs.

The first three pilot stores that were opened in Moscow and Krasnodar in summer 2019 received positive feedback from customers and were commercially viable, therefore the concept was rolled out further with six more store openings in 2020.

Magnit Metropolitan

Magnit opened the first metropolitan convenience store in October 2020. It reflects customer preferences in metropolitan areas and its design focuses on creating a pleasant ambience, providing useful services and digital solutions while maintaining attractive prices. The updated Magnit store boasts an assortment of around 6,000 SKUs, with particular focus on the Fresh and Ultra-Fresh categories, which occupy 35% of the sales area.

For improved customer convenience, a Magnit Pharmacy is located on the same site. The Company plans to use the elements of the metropolitan store concept in different combinations in other localities in the future.

Magnit Discounters (Moya Tsena)

These outlets have a comparatively limited product range of around 1,750 high-demand SKUs with a large proportion of the entry price products (around 65% of total assortment), private labels (around 18% of total assortment), and value packs: fruits, vegetables, dry foods, dairy, confections, etc. The concept also has a reduced staffing level compared to the convenience store and requires much less capital expenditures for opening.

The first three stores in this new format were opened in July 2020 in Samara, Volgograd and Ulyanovsk region. They replaced existing Magnit convenience stores that did not fully meet CVP requirements but were well suited for the discounter concept. These initial three stores showed promising results, so the format was rolled out to Krasnodar and Lipetsk region in September 2020. By the end of 2020, 16 Moya Tsena stores were opened, with more planned in 2021.
Operational Review (continued)

Supermarkets include two sub-formats – Magnit Family supermarkets and Magnit Extra superstores. In 2020 Magnit supermarkets continued to grow, despite being impacted by changing consumer habits. The federal lockdown did not have any impact on standalone stores, but those located within closed shopping centres also had to close.

Magnit’s goal is to increase the sales density of the supermarkets. The larger formats now have an improved product range, café, extended in-store food offering, more seasonal and less non-food offers, as the overall consumer behavior has shifted towards bulk buying of seasonal, fresh and ultra-fresh categories.

New cross-docking stations will also enhance the product range and the new store layouts are designed to unify the layout approach across all the stores. Supermarkets account for 13% of Magnit’s net retail sales. Three stores were closed in 2020 (on a net basis) and 25 were redesigned.

Supermarkets

1.7% year-on-year sales growth
941 thous sq. m of selling space
-0.8% year-on-year increase in selling space
13% of the net retail sales
0.8% LFL sales growth
1.5% sales density increase year-on-year

470 stores
3 stores closed (net)

Themed stores

Some Magnit superstores have a themed design. They are located in the cities that have hosted notable events or have famous local industries.

Adler, Sochi: the store is dedicated to the Winter Olympic Games.

Krasnodar: in October 2020 Magnit launched a new superstore in collaboration with suppliers designed as a candy factory.

Togliatti, Samara region (famous for the Avtovaz car-producing factory): the store design resembles city streets, walkways and car elements; traffic signs are installed as navigation tools and the store is decorated with a few real cars.

Samara (the heart of the Russian aerospace industry): aerospace-themed store with sky images and planets of the Solar system.

Magnit Family Supermarkets

The supermarkets have a larger product range than the Convenience stores and are located within walking distance of residential communities and business districts, as well as in shopping centres. This format is offering the full product range at attractive prices.

Magnit Extra Superstores

Magnit superstores are modern and high-tech stores for the whole family located within the city area. Such stores have broader range of all products, including Magnit’s private labels, with a focus on fresh and ultra-fresh products.

In 2020 Magnit launched its supermarket delivery service. The service allows customers to receive their orders within three hours or book a delivery for a certain time within the next two days. The cost of delivery ranges RUB 0-199 depending on the order amount. The online service offers a convenient way for customers to shop and over 25,000 products are available online.
Operational Review (continued)

**Magnit Cosmetic**

- **22.4%** year-on-year sales growth
- **6,183** stores
- **10.3%** LFL sales growth
- **9.7%** year-on-year increase in selling space
- **1,428** thousand sq. m of selling space
- **553** net store openings
- **7.2%** sales density increase year-on-year

The Magnit Cosmetic format was launched by the Company in 2010 and accounts for 9% of net retail revenue, an increase of 0.7 p.p. compared to 2019. These stores stock non-food products such as mass-market make-up products and personal care items (including private label products), household cleaning products, perfumes, hygiene products, and household items. Magnit Cosmetic is the most dynamic and successful format of the Company, with double digit positive LFL sales growth of 10.3%. In 2020 it also benefited from the proximity to the customers and the closure of competitor stores. 553 new drogeries opened (on net basis) in 2020.

With 80 stores redesigned during the year the share of drogeries operating under the new concept reached 56%. By year end, there were 6,183 stores, an increase in selling space of 9.7%. As a result, revenue reached RUB 114 bln, a 22.4% increase year-on-year. Sales density improved by 72% year-on-year.

One of the most important changes of 2020 was the refinement of product ranges between different stores to meet the needs of different customer types in different locations, with certain locations stocking an increasing number of eco-friendly products to meet customer demand.

Magnit is targeting strong levels of growth for its cosmetics business. In 2020 Magnit started rolling out the mini format of Magnit Cosmetic to existing convenience stores in selected locations. The cosmetics store, which offers customers around 4,000 products, will improve the customer proposition of Magnit Convenience stores and enhance the sales density. In December 2020, delivery services from Magnit Cosmetic were launched in Krasnodar and Ekaterinburg and we plan to expand the delivery services in 2021.

**Magnit Pharmacy**

This modern pharmacy format was launched by the Company in 2017 and is characterized by its affordable prices, easy navigation, convenient open display and friendly and professional staff.

In 2020, Magnit began a click and collect service that allows customers to order products online and collect from over 100 pick-up locations in Magnit Pharmacies throughout Moscow and the Moscow region. Customers can choose between two types of click & collect service: 30 minutes’ pick-up of products in-stock at the nearest store or next-day pick-up of full product range held in the warehouse.

On the Magnit corporate website, 3D-tours of various store formats are available for all visitors. This online experience allows participants to visit all of the Magnit formats: convenience stores, supermarkets, Magnit Cosmetic stores and pharmacies, and discover more about how they operate.

**E-commerce**

In H2 2020 Magnit started testing e-commerce services, both independently and in cooperation with partners.

At the end of 2020, Magnit operated six online delivery projects, all of them in pilot stage. Magnit is continually evolving the format of its delivery service to satisfy the needs of all customers.

The Company started developing its food-tech business together with industry specialists, partnering with Delivery Club in August 2020, and with Yandex.Eda in September 2020. Both services provide express delivery within 1 hour.

In September, the Company introduced online ordering for its Magnit Pharmacy format; in early November, it launched its own Magnit Delivery app for express deliveries within Moscow, and later in November it also started a regular delivery service from Magnit Family stores in Krasnodar. In the beginning of December 2020, Magnit and Delivery Club launched deliveries from Magnit Cosmetic stores in Ekaterinburg and Krasnodar.

During the first three months, the pilot schemes’ growth dynamics exceeded original expectations and highlighted the potential of this market.

During the first three months, the pilot schemes’ growth dynamics exceeded original expectations and highlighted the potential of this market.

Magnit fulfills around 6,000 online orders every day. According to the Company’s analysis, most of the orders are placed by customers who did not shop at its brick-and-mortar stores before.

The annualised run rate for Magnit’s online segment stands at RUB 2.0 bln based on December sales turnover. Among these segments, convenience store-based express delivery has the highest sales and shows the best growth dynamics.

Magnit’s e-commerce services today covers over 1,000 stores in 47 regions and 72 cities, with around 50% of the current revenue from these online projects generated outside Moscow and St Petersburg. During 2021, the Company plans to expand online delivery adding at least 1,500 convenience, drogeries and large-format stores in more than 50 regions across Russia.

Improving Customer Experience

Magnit always strives to deliver the best customer experience across all market segments.

Several important milestones were achieved in 2020, with the introduction of new product ranges, updated navigation across all the formats, increased availability and quality of the product range, refreshed private labels and development of the customer loyalty programme. Another focus area and crucial task during the pandemic was safety of the customers and employees. Even during nationwide quarantine Magnit didn’t close a single store.

In March 2020, we formulated our social mission and introduced a role of an “on duty officer”. This approach was welcomed by our staff and helped to increase team morale.

Magnit aims to build an ecosystem of complementary services around its brand and strong omnichannel presence. Digitalisation will play an important role in improving customer experience, across all stages of the consumer journey.

During the year, Magnit actively hired workers from its partners to help them sustain their financial position and close the shortage of employees for the Company; overall we hired 2,500 people in 2020.

Magnit staff are constantly trained to provide the best service and hospitality to the customers, while being efficient and using the best available technologies.

- We introduced clusterisation in different localities
- We improved layout, navigation and zoning within the stores
- We are open and friendly to our customers, employees and suppliers
- We use cutting-edge technologies to understand customer habits and behaviours to offer them the best possible experience
- We take care of our employees and offer them all opportunities for education and personal development.

2020 Annual Report
2020 Annual Report

Best Customer Experience

Pilot projects at different stages of development and implementation.

Digital tools

- SelfieToPay: face-recognition-based payment technology
- Dual-mode checkouts (work both as self-service terminals and standard cashier-operated checkouts)
- MobiScan: app to scan and pay at self-service checkouts

Interactive

- Informative in-store navigation
- Selection of goods with mobile scanner / app
- Easier and faster check-out with mobile payment

Payment

- Digital loyalty card
- Magnit payment solution

**Measures Against COVID-19: Taking Care of Everyone**

Since the beginning of the pandemic, Magnit has introduced a number of measures to make shopping at our stores as comfortable and safe as possible.

The company is committed to helping customers and employees to reduce the spread of COVID-19 and support those who are struggling. In difficult conditions, we continue to provide customers of 66 regions across Russia with all their required products and services, maintain our supply chains and logistics, and introduce new safety and hygiene measures.

Magnit is attentive and responsible to the situation, therefore:

- **We’ve improved store safety**
  - Increased the number of activities for the disinfection of premises, tools and equipment
  - Restricted staff movement between premises and face-to-face meetings
  - Adjusted the work schedule to remove any contact between shifts
  - Transferred some of the administrative staff to remote working
  - We assess the quality of products remotely; product specialists are able to assess goods with video cameras.
  - We carry out daily medical examinations and temperature checks for employees.

- **We have improved safety measures at distribution centres**
  - Increased the number of activities for disinfection of premises, tools and equipment
  - Restriction of staff movement between premises and face-to-face meetings
  - Adjusted the work schedule to remove any contact between shifts
  - Transferred some of the administrative staff to remote working
  - We assess the quality of products remotely; product specialists are able to assess goods with video cameras.
  - We carry out daily medical examinations and temperature checks for employees.

- **We have adapted the delivery of products**
  - We maintain a sufficient level of stocks in distribution centres
  - Increased shipments of goods from distribution centres to stores
  - Increased the level of stocks in retail outlets where appropriate.

- **We are supporting the most vulnerable**
  - We were selling several socially important product categories with zero markup during the pandemic
  - With the support of the Ministry of Health of the Russian Federation, we issued a series of special bonus cards for medical workers with an increased accrual of bonuses of 20%.
  - On weekends until 11 am we provide a 20% discount to pensioners, volunteers and social workers for purchasing goods for the elderly
  - Launched the #MagnitZabota programme and, with the assistance of regional authorities, we provide food packages to socially vulnerable citizens
  - We supported personnel of other organisations who had to suspend their operations by temporarily engaging them in our stores and distribution centres.

---

**Organisational Structure**

Magnit is upgrading its organisational structure by developing its multi-format approach to ensure the correct distribution of formats across the regions. Our new organisational design reflects the right balance of centralisation and decentralisation. We have introduced new format heads in commercial and operations functions to strengthen format focus and expertise. We have a new digital, tech and OMNI team to strengthen tech, Big Data and e-commerce capabilities. We have a separate procurement team in the commercial department, including Private Label, own production and direct import. We are rebalancing RACP between commercial and supply chain departments to ensure E2E ownership.

**Headquarters**

Head Office is responsible for strategy development, budget and methodology and serves as a centre of best practice to implement across the regions. Head Office also performs a centralized support function via its Shared Service Centre.

In 2020 Magnit has completed its migration of its financial function to the Shared Service Centre (SSC), established in 2019 in Krasnodar. Now, Magnit’s SSC will keep centralised accounts of all transactions and perform payroll calculations for over 300,000 employees in 66 regions from all of branches, districts, distribution centres, and motor transport enterprises. Centralisation of the financial function (accounting and payroll calculations) in the SSC will enable Magnit to save around 27% of its cost before migration, or around RUB 470 mln annually.

Magnit’s SSC was awarded the winner of the “Best SSC rollout in Russia and CIS” award, beating peers across different industries. The criteria included the technological level and the overall achievements for the reporting period.

The Shared Service Centre will largely contribute to the Magnit’s automation and centralisation, utilizing robotics to carry out the routine tasks and standard requests which were previously handled by regional teams.

**Regional Structure**

There are eight regional heads managing their respective territories. Regional Heads are responsible for openings & redesigns, CVP execution and local category management. Regional Heads report to Head Office.

The primary focus is on operational efficiency, quality control, and development of customer satisfaction. The digital transformation of Magnit and aligning the ERP system into communication processes will allow for more effective communication between the branches and the Head Office.
The concept of category management (CM) was introduced in Magnit in 2019. It has concentrated on the promotional transformation and new product management along with Consumer Decision Tree developments. Category management has become one of the drivers of Magnit’s transformation, and in 2020 there were several key topics which the Company addressed. They included working out the CVP strategy for each format, format-specific category management and extremely successful loyalty programme rollout. One of the milestones of the 2020 has become the product range management.

Magnit has four pillars of its category management which are at the heart of the business, ensuring the customer remains the focus for all business decisions and transformations. Magnit uses state-of-the-art analytics and Big Data tools to drive its transformation towards knowing the customer and understanding what the customer wants.

Category management has been taught in the Magnit Corporate Academy since 2019. The training programme covers all functional levels (line managers, category managers and category directors), and 250 people have already completed their curriculum.

### Product range management

The Company is working towards the optimal balance between promotional activities and pricing strategies within its product range management. The eventual goal is to embed the category management principles across all the supply chain to ensure the best possible product range in all Magnit formats.

In 2020 Magnit has started its transition towards new Product Management System, which was adjusted to reflect the different regions and formats within the category management structure. It allows more flexibility and for individual approach to each particular store.

### Transition to the new product management system

- Target matrix management
- Assortment matrix corrections according to the new releases
- Dates agreed with commodity experts to place items on sets
- Automated assortment update in accordance with the target category matrix
- Selection of rotating pairs to keep picking points between the displayed product range and new products
Cooperation with Suppliers

Efficient cooperation with our suppliers allows us to make more accurate plans and forecasts, to optimise procurement volumes, to deliver the best products at minimum cost and to achieve better commercial terms.

There are still areas for potential improvement in cooperation with suppliers. Some of the main focus areas Magnit is currently working include the flow of key documents, improving forecasting techniques, on-shelf product availability and sharing information about the customer preferences and upcoming projects.

To benefit from the synergies of working with the suppliers, Magnit is committed to being a reliable and trusted partner. In 2020, the Company held a conference to discussing the major trends and upcoming projects.

**“Implant” project**

In 2019 we launched the unique “Implant” project. Magnit invites employees of our major suppliers to work in our offices in order to build cooperation and understanding, and also offer an external viewpoint of our processes and procedures with a view to improving efficiencies and best practice.

At the end of last year, 13 suppliers’ representatives worked at Magnit. This year, the number of “Implants” will increase by at least another 30. In 2020, the service level of suppliers participating in the “Implant” project increased by 4.9%, and completeness and timeliness of their deliveries by 7.4%.

In addition, the availability of goods on the shelf among some of Magnit’s partners increased by an average of 10.6%, the forecasting accuracy of purchases at the distribution centres (DCs) increased by 10.3%, and the level of service for shipments from the DC to retail outlets increased by another 6.7%.

**Advanced barcodes**

Magnit started to implement advanced barcodes which include the expiry date. It enables the Company to better understand the volumes and expiry dates of goods in order to offer the best possible markdown method and to provide optimal discount. At the pilot stage, the project was encompassing 17 suppliers and 225 SKUs. Due to the use of advanced barcodes, the delivery of fresh products was optimized to reduce wastage and as a result, Magnit will drastically decrease the volume of wasted produce and save millions of rubles annually.

**Vendor Managed Inventory**

In 2020, Magnit, in cooperation with Baltika, piloted a vendor management inventory system at Samara DC. The system is based on the SaaS solution GCR from Generix Group and allows suppliers to autonomously forecast and replenish stock at the retailer’s DC. It analyses the data provided by the retailer on daily basis and suggests the optimal delivery volume. The supplier immediately learns about sales trends and in case of any shortages may ship the necessary goods on the same day. The use of the VMI system helps to improve the freshness of products on the shelf due to more frequent restocking, allows to reduce costs for calculating needs and placing orders and to accelerate turnover.

The pilot showed a higher level of efficiency than expected, and the project will be extended to different DCs and different suppliers.

**Goods availability assessment system**

The Company has developed a digital solution to assess and monitor availability of products in stores. The automatic system identifies and performs detailed analysis of delivery-related failures along the entire chain, from the manufacturer to the shelf. With the help of big data and machine learning, the system analyses deviations using an extensive library containing data about sales and products. When the system was piloted, sales in the 100 stores chosen for testing increased by 1.5–2%. Sales of promotional products, which the Company is also working on, increased by almost 17% in Magnit’s Cosmetic stores and by 5% in Convenience stores.

**Startups to launch pilots with Magnit**

In Magnit’s Digital Office in Skolkovo, several finalists of the MGNTech Accelerator were invited to showcase their ideas — the first project of this kind for the retailer. During the Demo Day, the Foundation’s specialists and Company executives selected 10 innovative projects with the most potential for further development. The Company is expecting the increase in economic impact from scaling the innovations that succeed during the pilot phase to be at least RUB 1 bln in 2022–2023. Startups include BestPlace — a geanalytics platform utilising consumer data for segmenting stores and managing the product range depending on the customer’s profile, and Bio Z Laboratory — a solution for increasing the freshness and shelf life of products using active packaging.

In 2019-2020 the Company launched a number of new projects for suppliers. The Magnit Service Portal now allows the exchange of logistics data and can track the speed and quality of product shipments to distribution centres. Suppliers can familiarise themselves with any deviations in logistics and adjust tasks to respond quickly.

In addition, Magnit introduced digital contracts with suppliers, significantly reducing the time needed for document verification.

economic impact from scaling the innovations
Private Label and Own Production

Magnit is the only food retailer in Russia with its own food production facilities. The development of Magnit’s Private Label (PL) range is central to our customer value proposition (CVP). Such products not only provide excellent value for money, but also higher margins compared to branded goods.

To date, Magnit stores stock over 2500 PL SKUs in various categories: milk and dairy products, flour, cereals, soft drinks, tea, coffee, meat and vegetable preservation, fruits and vegetables, confectionery and household goods.

In 2020 we continued to optimise our private label portfolio and expand the product range. We scaled up our ‘My Price’ brand and the ‘Magnit family’ brands, and continued the roll-out of the portfolio of cross-category PL. Since the beginning of 2020, the ‘My Price’ and ‘Magnit family’ brands are available in the majority of Magnit stores.

Magnit has developed its Magnit Freshness brand incorporating over 100 SKUs in the fruit and vegetable category (including cucumbers, tomatoes, mushrooms, lettuce), with dairy and meat items added during 2020. We also made other notable improvements to the range, expanding our range of tomatoes, increasing production of eggplant and green lettuce, and exploring opportunities to invest in the production of oyster mushrooms.

Magnit is seeking to broaden its PL range by enhancing in-house production capabilities and by building long-term relationships with its partners and external suppliers of products for the PL. In particular, Magnit is looking into the possibility of directly importing exclusive products in order to develop its unique private label line.

Quality of PL products

To ensure high standards of PL products, we carry out a range of quality assurance tests such as vendor auditing and consumer testing. In 2021, we plan to audit all PL suppliers and more than double the number of laboratory tests carried out on products.

Awards received in 2020 by Magnit for its PL products:

44 Magnit’s PL products: Quality Assurance, a competition of food products quality (18 gold medals, 16 silver medals, 10 quality diplomas)

Gusto di Roma (pasta) Private Label Awards, Best Private Label for Food Products and Best Department of Private Label nominations

Premiere of Taste (Magnit’s premium PL): Dieline, Pentawards and White Square international design competitions (Silver)

23 Magnit’s PL products awarded at the competition ‘100 Best Goods of Russia’

59 Magnit’s PL products awarded with the ‘Made in Kuban’ mark of quality

Zollider (a brand of care cosmetics for men, in cooperation with Gradient): listed by Forbes among the most successful new brands in Russia

Stellary (a brand of decorative cosmetics, mascara): Best of Beauty 2020 by Glamour magazine

PL products are available across each of Magnit’s price brackets:

Quality of products

Magnit focuses on continuous development and improvement of its own production facilities. We recruit the best specialists in the field, and special laboratories conduct tests of our new products to ensure quality control throughout the production process, from raw materials to the finished product. All production facilities are constantly monitored online to maintain a high quality throughout the cycle. Our production complies with GOST R ISO 22000-2007 and the International Food Safety System Certification (FSSC) v8.

Development of own production

In 2020, Magnit opened a cheese slicing and packaging facility in the city of Penza and the same type of production in Dmitrov, Moscow area. A citrus packaging facility was commissioned in Novosorvsky, enabling the Company to expand its offer of packaged fresh products, reduce the load on logistics and improve quality control of the products. A number of initiatives were started throughout the year, including the development of different types of fillings for confectionary at Kuban Factory of Bakery Products LLC and chocolate paste production lines at Kuban Confectioner LLC, designing a new production facility for green crops, a production complex for growing oyster mushrooms and a facility for roasting, grinding and packaging coffee.

In addition, in April Magnit completed the first stage of construction of the second greenhouse complex in Tikhoretsk district of Krasnodar region. The greenhouses produce cucumbers, tomatoes, eggplants and lettuce.
Private Label and Own Production (continued)

**In-house production**

Underpinning Magnit’s PL range are the Company’s in-house production facilities. Magnit operates 13 industrial and four agricultural facilities, located in Krasnodar, Saratov, Ufa, Tver, Lipetsk and Togliatti regions.

In house production enables the Company to deliver local products to our stores, including in the fresh category products: among the produced goods are frozen semi-finished products, pasta, snacks, cereals, vegetables. The Company’s own facilities set a record in 2020, having produced 310,000 tonnes of products, a 31% increase in sales year-on-year.

Magnit is the only Russian food retailer with its own agricultural facilities producing fresh vegetables, three of which are located in Kuban, and one in the Lipetsk region. The total area of greenhouses is 115 hectares and annual production of agricultural products is 98,000 tonnes. Our greenhouse complex Zelenaya Liniya is the second largest in Russia (by greenhouse surface area and volume of vegetables produced).

Magnit’s production sites primarily produce products for the low-price segment; however, the sites will be further reoriented towards the production of food with higher added value going forward. Thus, the share of our own production in these categories is expected to increase.

When designing and developing our production facilities, we take into account structural changes in consumer taste, such as increased demand for products in the fresh and ultra-fresh categories.

**Share of in-house production across different product types, %**

- Pasta: 13%
- Tomatoes: 22%
- Cucumbers: 22%

**Shiitake mushroom production**

Magnit piloted Russia’s first compact plant to produce exotic shiitake mushrooms. The plant is located in the Company’s mushroom complex in the Krasnodar region. It is unique due to its remote management of the growing process which utilizes artificial intelligence (AI). The AI system controls the environment to ensure optimal growing conditions: climate control, operation of sensors and controllers and energy recovery.

During this first stage, the plant produced almost 1.5 tonnes of mushrooms per month.

**Sustainability of the PL range**

In line with the Company’s Sustainability Strategy, 50% of packaging for PL and own production will be recyclable, reusable or compostable.

Marketing and Loyalty Programme

Marketing

Our strategic goal is to become a love brand, which drives us to design customer experience around their personality rather than their wallet, give them something more than products at competitive prices, and provide enjoyment in their daily lives.

Magnit’s marketing function ensures superior customer communication and strives to provide personalised recommendations to all our customers. We seek to communicate each of our different offerings clearly so our audience understands the different Magnit formats.

In order to ensure the effectiveness of our marketing campaigns, we develop a deep understanding of the target audience and their preferences. Our priority is to use the correct messaging in order to really resonate with our audience and their preferences. Our deep understanding of the target audience helps us ensure the success of our marketing campaigns, as we develop and provide brands and advertising agencies with a tool to accurately set up the customer communications.

— My Magnit’ magazine – the biggest Russian printed periodical of a retailer. The magazine contains information about products, shows customers additional information about products, adds a level of interaction (linked to the Troika card).
— ‘My Magnit’ magazine – the biggest Russian printed periodical of a retailer. The magazine contains information about products, shows customers additional information about products, adds a level of interaction (linked to the Troika card).
— Digital marketing platform used to identify target groups on various websites, such as VK, Yandex and Odnoklassniki, Facebook (incl. Instagram) and Google (incl. Youtube), and to use targeted advertising to each of these groups based on the chosen criteria. The platform enables an increase in the accuracy of the marketing campaigns of between x2 – x5, while the increase in sales per contact may reach 5-15%.
— Combining the customer data processing technologies of the Chain’s Digital Marketing Platform and Remir Research Holding, which enables Magnit to increase the effectiveness of its own marketing campaigns and provide brands and advertising agencies with a tool to accurately set up the customer communications.

Key marketing campaigns of 2020

Collaboration with Gorod loyalty programme

In September 2020, we launched a promotion campaign in Magnit and Magnit Cosmetic stores in Moscow and the Moscow region: up to 50% of the purchase amount was returned as bonus cashback in the Gorod mobile app (linked to the Troika card).

The bonuses could be exchanged for a discount coupon, which gives the opportunity to defray up to 100% of the check amount minus Rubl. e., in Magnit and Magnit Cosmetic stores. It might be used to pay for mobile, transportation, or exchanged for up to 99% discount with partners.

This type of marketing campaign is unique for Russian retail. It attracts customers, adds a level of interaction in stores, shows customers additional information about products, and suggests similar products with cashback options. We also estimate that in the future, such programme might potentially change customer experience in offline stores.

Skrepyshi 2

In 2020 (from September 30 to November 22) Magnit ran the “Skrepyshi 2” marketing campaign.

In 2020, the campaign was even more successful in the course of the campaign, Magnit handed out over 242 mln pcs. of Skrepyshi (52 mln pcs. more than a year before), and the Company’s total turnover increased by approximately 2.3% (compared to the approximate rise of 1.8% in 2019).

Pora otygrat’sya (Time to recoup)

In August-October 2020, Magnit ran a gamified promotion campaign Pora otygrat’sya (Time to recoup) for members of the loyalty programme. The loyalty card members were able to win Apple gadgets and other exciting prizes such as gift cards, discounts and coupons. To win a prize, customers had to shop in supermarkets, scan their receipts and be active in the Magnit official mobile app in VK – vk.cc/magnitapp.

The campaign showed excellent results with 1.5 mln participants, 2 mln receipts registered and the number of Magnit’s social media subscribers increased by 700%.
Marketing and Loyalty Programme (continued)

Our award system is one of the most attractive on the market: a customer obtains a basic bonus of 0.5–2%, depending on the purchase amount. In addition, customers earn personal points for participation in different promotions (1 bonus point equals RUB 1, and can be used to cover up to 100% of the purchase price).

In 2020 we finished the roll-out of the loyalty programme. As of the end of 2020, the number of active users reached 43.5 mln. The share of the company’s revenue with the use of loyalty cards was 70%. The loyalty programme also delivers positive cross-format gains with sustainable growth of customers visiting two and more store formats at the end of 2020, the share of such customers was almost 64%.

Magnit continues to develop its loyalty programme. The updated programme will be characterised by increased levels of personalisation, and emotional engagement with participants. Among the features of the updated loyalty programme 2.0 are implementing the principles of Customer Value Management, based on the customer life-circle, automated omnichannel system of requests processing, super app and personal accounts for users, clubs and additional services (Magnit Pay, Magnit Mobile).

Apart from that, we have created a long-term saving loyalty programme with a single currency “Magnitki” and product rotation. We will launch digital stickers along with traditional ones, and will create our own recognisable brands as the extension of the Skippyshi and Royal Kuchen programmes.

In 2020, Magnit loyalty programme received the prizes in Loyalty Awards Russia 2020 – the national award in the field of loyalty marketing and CRM:
- Best loyalty programme of a food retailer
- Start of the year – best new project in loyalty marketing.

Co-branded bank cards and partnerships
As part of its loyalty programme, Magnit launches and develops co-branded products with banks, which helps to increase customer loyalty and retail turnover, as well as commission from partnering banks.

Since 2019, Magnit has co-branded bank cards with Pochta Bank and Tinkoff Bank, which allow their holders to gain extra bonus points in the Company’s loyalty programmes. In 2020 Magnit continued to collaborate with the banking industry. Together with Modulbank, we issued the first co-branded card for entrepreneurs. The card is linked to an SME bank account, where the individual may gain and spend bonuses; it also provides additional benefits from selected partners.

In November 2020, the VTB-Magnit co-branded debit card was launched. Card holders benefit from bonuses of up to 5% of purchases in Magnit stores and additional bonuses from transactions in other retail chains.

To offer customers more value through the loyalty card and to monetise its database, Magnit has started partnerships with other brands. By the end of 2020, over 66 external partners accrued bonuses on the Magnit loyalty card, among them fashion retailers, Hoffee, educational services and other services.

Logistics

Magnit’s logistics system operates 38 distribution centres with 1.7 mln sq. m of warehouse space, a fleet of more than 4,400 trucks and almost 34 thou. employees. In 2020, Magnit continued to implement measures aimed at increasing the efficiency of its logistics and supply chain in line with “The chain of freshness” strategy introduced a year earlier. The strategy covers all areas of logistics including distribution, transit, international delivery, distribution centres, and management structure.

Magnit’s retail network will enable its suppliers to independently forecast and replenish stocks at the retailer’s distribution centres (DC). In 2020, the vendor management inventory system was implemented in the Company on the basis of the GCR Saas solution developed by Genesys Group, an international vendor of cloud solutions for automation and supply chain optimisation. The system reduces labour costs for calculating capacities and placing an order as it independently suggests the recommended volume of products for shipment for each DC.

It was initially tested together with Baltika in Samara and showed positive results in terms of store satisfaction and freshness of delivered goods. It is expected that the system will be implemented throughout the Magnit chain.

The Company equipped all 38 of its distribution centres with a remote temperature monitoring system and implemented sensors to keep track of the conditions during delivery to the store. Currently, the level of compliance with the temperature requirements is at 96% for the logistics centres, and 95% for the vehicle fleet. In the future, Magnit plans to bring these figures up to 100%.

Magnit has embarked on an ambitious long-term programme of truck fleet renewal. Within the programme, the Company sells available trucks, purchases small duty vehicles and semi-trailers.

The new vehicles are suitable for big cities and can make several deliveries per day, which reduces delivery time of fresh produce to stores and contributes to Magnit’s “Freshness” strategy.

At the same time, the new mainline vehicles of increased cargo capacity will significantly reduce the Company’s delivery expenses.

In H1 2021 Magnit plans to purchase 750 vehicles. They will all comply with the Euro 5 emissions standard, contributing to the sustainability strategy and reducing the negative impact on the environment.

Co-branded bank cards

43 mln customers enrolled in the loyalty programme
70% penetration of loyalty card in sales
55% share of tickets using the loyalty card
More than every second purchase in Magnit is performed with a loyalty card

Loyalty programme and partnerships

The cross-format loyalty programme is one of the key tools of Magnit’s communication with various customer bases. Data collected within the programme provides a deep understanding of the customer needs, which enables us to improve category management, merchandising, product range localisation and promotional offers, as well as to develop private labels. Furthermore, the data allows Magnit to shift towards personalised digital marketing and targeted offers for customers.

The key feature of the Magnit loyalty programme is the opportunity to collect and spend bonus points across all retail chain formats: convenience stores, supermarkets, droggeries and pharmacies.
Logistics (continued)

Novosibirsk DC
One of the major achievements in logistical infrastructure was the opening of the new distribution centre in Novosibirsk which increased the warehousing capacity of the Company in Siberia.

Forecasting and replenishment
In late 2020, Magnit started to roll out the new Forecasting & Replenishment (F&R) system with the help of Relex solution platform. The project will become the largest in Russian logistics and one of the largest in the world, covering about 22,000 stores, 38 distribution centres, and will be adapted to the updated system and business architecture of the company. The new F&R system is based on AI and machine learning technologies and encompasses all functions of goods distribution, data analysis, accurate forecasting of sales volume for each product in each store and planning deliveries. Through its implementation, Magnit plans to significantly increase transparency of operations, increase availability of products, particularly for Fresh and Ultra-Fresh categories, optimise inventory, ensure a high level of service, and improve the quality and speed of interaction with suppliers. The pilot project will be launched in 2021 at one of the distribution centres in Krasnodar, which serves more than 1,250 stores.

Pooling
It has been two years since we launched pooling. Pooling entails the consolidated delivery of goods from different suppliers to distribution centres using a transport company. The system now encompasses 11 shipment regions and 10 transport companies. Pooling allows suppliers to reduce logistics costs by an average of 10-30%. In 2020, approximately 46,000 pallets per month (3% of the total turnover) were delivered through pooling. By the end of the year, 350 companies (~12% of suppliers) had joined the system.

Cross-docking platforms
Cross-docking platforms are the small warehouses located between the distribution centres and the stores used to consolidate incoming products for outgoing destinations. Thanks to cross-docking platforms, inbound and outbound shipment of items is carried out within one day.

Automation
Automation and digitalisation are key elements of Magnit's modernisation of logistics:

— RS+OSA+MS is the analytical platform merged from the three existing platforms, which allows to forecast the orders based on the sales from every point of the supply chain.
— Time slot is a system that manages the loading and unloading and allows to minimise potential for corruption and increase efficiency. It has been introduced in 100% of Magnit warehouses.
— Picking carousel is a project piloted in two warehouses which allows for faster introduction of items to the product range. It will be rolled-out in the first quarter of 2021.
— New Warehouse Management System (WMS) is aimed at decreasing the amount of warehousing space and the increasing the handling capacity of the warehouse. It is being piloted in one distribution centre and will be launched in all DCs by 2023.
— Pick by voice provides voice instructions to employees via headset. This improves labour efficiency and reduces errors. In 2020, all Magnit DCs were equipped with the system. It allows the user to keep track of the movement of products online. Personal assistants are used when assembling an assortment that does not require special storage conditions.

New electrical trucks “Moskva” are being tested by Magnit in DC Dmitrov. They were specifically designed for Magnit by the “DRIVE ELECTRO” company and will deliver goods for Magnit stores for the next 6-12 months. These new trucks are more environmentally friendly, create less noise and are fully equipped for the Russian climate. If the pilot is successful, Magnit will purchase 200 trucks.

1 Excluding small pharma warehouses located in the other regions.
2 Excluding pharmacies.
3 Share of goods delivered to the stores via distribution centres.
4 The number of trucks decreased in 2020 due to our truck fleet renewal programme.

Magnit plans to cover the local suppliers with the cross-docking platforms to decrease the costs of transportation and speed up the delivery process. In 2020 the new approach to cross-docking was introduced with the help of Nestle. It is also based on cross-docking model and reduces the time for delivery and the need for warehousing space.

Automation
Automation and digitalisation are key elements of Magnit’s modernisation of logistics:

— RS+OSA+MS is the analytical platform merged from the three existing platforms, which allows to forecast the orders based on the sales from every point of the supply chain.
— Time slot is a system that manages the loading and unloading and allows to minimise potential for corruption and increase efficiency. It has been introduced in 100% of Magnit warehouses.

Future Development

There is a pipeline of logistics projects to be launched and piloted in 2021, including scaling the WMS system and developing the cross-docking and pooling systems. Magnit will try to align the supply chain for the specific format, while ensuring timely and safe delivery.

Quality Control

Magnit devotes a lot of attention to the quality of its products and made several improvements in 2020. We constantly review and update internal regulatory documents on food and non-food safety, as well as standards and procedures for effective management of food and non-food safety risks. We support and enhance the quality management system and the system for supplier evaluation. The quality management system is being improved along the entire supply chain and monitored through internal audits and preparation for third-party certification audits.

Magnit has a quality control team who oversee this function, comprised of qualified professionals with the required knowledge and experience. In 2020, Magnit adopted a food and non-food product quality and safety policy. It states the company’s commitment to compliance with Russian laws and regulations concerning the quality and safety of food and non-food products.

In March 2020, Magnit introduced the position of Quality Attendant, responsible for daily control of the quality of goods. The Quality Attendant monitors the cleanliness of the store throughout the day, the quality of food, including checking the fresh and ultra-fresh products, and the product display on the shelves. Customers may recognise the Quality Attendant by a special pin on their uniform and address them with any concerns and questions. This focus on quality is a key part of our plan to be the first-choice grocery retailer for Russian customers.

Digital transformation

Our ambition - to further enhance our customer experience and provide complementary services beyond our core offering, and to ensure an effective modernisation of our internal processes and overall systems to drive cost efficiencies and ensure effective scalability in the long-run.

Magnit is on track with its digital transformation, which enables a better shopping experience and improves staff productivity. Moreover, it has the potential to improve returns to our shareholders and benefits all the stakeholders, including Magnit’s customers, employees, suppliers and investors.

Magnit has made significant progress towards process automation, with the rollout of the loyalty programme, implementation of e-commerce development, initiation of the electronic document flow and kick-off of the ERP SAP introduction. We also introduced the Supplier Relationship Management system for our production facilities.

A lot of work has already taken place to improve internal levels of automation and efficiency, and Magnit has now brought all these projects under one umbrella strategy, the large-scale Digital Transformation Programme. For 2021, the company has defined 7 major goals for its digital transformation.

Fix & Re-Build Tech

Fix (short-term) ways of working in IT and Data and minimise tech barriers and re-build (mid- and long-term) IT and Data architecture, overall tech Employee Value Proposition (EVP), and ensure the correct approach to systems and resource management to improve the quality and speed up time to market for tech initiatives.

Support retail core via Tech & Data

Support implementation of game-changing core systems and enable retail and service functions to operate smoothly and efficiently using appropriate tech and data infrastructure and tools.

Establish strong (Digital) consumer brand

Build strong brand fundamentals with a data-driven approach to all aspects of marketing and personalisation.

Drive Change

Drive, track and communicate change, focusing on digital transformation and ensure track and trace of functional and E2E transformation initiatives.

Fund the journey & run effective budget management for impact

Implement a sustainable, effective and transparent financial process with a systematic and balanced approach across all financial procedures.

Build a strong team & effective HR management for digital team

Focus on development of strong and motivated digital transformation team by building an attractive Magnit Tech Brand, proper talent acquisition and development processes controlled by effective HR KPI reporting.
Future Development (continued)

ERP Transformation

ERP (Enterprise Resource Planning) is aimed at facilitating the management of business processes in the Company. The ERP system builds the strong foundation for the further initiatives across all business areas.

The entire ERP Transformation Programme will take up to five years. By end of 2022, Magnit will complete the pilot phases for each solution, it will then take 5 years to roll them out across the company.

As a result of the ERP integration Magnit expects the major economic benefits will come in the area of Goods Movement and Logistics through the reduction of inventory and write-offs, etc.

The ERP-driven Supply Chain effects are expected to be amplified by successful delivery of other core modernisation projects such as Forecasting & Replenishment or WMS relaunch. Magnit also expects increased efficiencies in finance, non-commercial procurement and human resource processes.

Magnit’s ERP Transformation Programme consists of the following SAP solutions:

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SAP S/4Hana for Retail</td>
<td>The powerful tool to utilise all financial and commercial functions and unify all the business processes within the Company</td>
</tr>
<tr>
<td>SAP Central Finance</td>
<td>The system unifies the financials of all Magnit’s enterprises</td>
</tr>
<tr>
<td>SAP CAR</td>
<td>The modern check storage to be created within Magnit</td>
</tr>
<tr>
<td>SAP Track and Trace</td>
<td>The programme will trace the operations to comply with all the regulations</td>
</tr>
<tr>
<td>SAP Business Objects and SAP Analytics Cloud</td>
<td>The tools will be used to construct corporate analytics and unification of the reporting</td>
</tr>
</tbody>
</table>

On top of implementing the SAP solutions, Magnit is also developing three self-standing projects in partnership with leading integrators delivering SAP solutions:

1. Goods movement and Logistics
2. Finance, Non-commercial procurement and Real Estate
3. HR project
4. Middleware, Internal SAP Centre of Excellence

Magnt’s internal team

Implementation in partnership with leading integrators delivering SAP solutions

Build a strong brand and product

This focuses on ensuring effective and engaging interaction with customers, given the unprecedented size of Magnit’s loyalty base.

— E-commerce. In H2 2020 Magnit started testing e-commerce services, both independently and in cooperation with partners. Magnit piloted six online delivery projects in 2020 and is refining the format to meet customer needs. By the end of the year, Magnit’s e-commerce services encompassed over 1,000 stores in 47 regions and 72 cities. During 2021, the Company plans to expand online delivery, adding at least 1,500 convenience, Magnit Cosmetic and large-format stores in more than 50 regions across Russia.

For more information about our e-commerce projects, please see p. 65.

— Adjacent Projects

- MPay is a new tool which allows customers to pay for their purchases in any store, including online orders. The virtual card can be topped up for free or added to various pay services and allows customers to transfer money to any Russian card. The tool is especially beneficial for loyalty programme members, as by using Magnit Pay they get an additional 0.5% of their purchase amount accrued as bonus points. For 30 days after the first purchase, customers will receive double point rewards. The launch of Magnit Pay represents an important milestone in the establishment of Magnit’s superapp.

ERP Transformation Programme consists of the following SAP solutions:

- SAP S/4Hana for Retail: The powerful tool to utilise all financial and commercial functions and unify all the business processes within the Company.
- SAP Central Finance: The system unifies the financials of all Magnit’s enterprises.
- SAP CAR: The modern check storage to be created within Magnit.
- SAP Track and Trace: The programme will trace the operations to comply with all the regulations.
- SAP Business Objects and SAP Analytics Cloud: The tools will be used to construct corporate analytics and unification of the reporting.

Since the payment service was brought online, about 100,000 Magnit customers have become active users, of which 60 thous. users have added a Magnit Pay card to contactless payment services for offline usage. Every day, about 30 thous. virtual payment cards are issued via Magnit’s app, with their total number already standing at about 2 million.

- MMobile (Magnit Mobile) is an MVNO service that Magnit is developing to allow customers to benefit from both the mobile and retail: the loyal customers will be able to get mobile traffic almost for free, just making the regular purchases in Magnit.
- Mobiscan is a self-scanning device that will be installed in the shops and digitalise the store experience for the customer.

Future Development

Future Development (continued)

There are four underlying projects included into the ERP Transformation Programme:

1. Goods movement and Logistics
2. Finance, Non-commercial procurement and Real Estate
3. HR project
4. Middleware, Internal SAP Centre of Excellence

Build a strong brand and product

This focuses on ensuring effective and engaging interaction with customers, given the unprecedented size of Magnit’s loyalty base.

— E-commerce. In H2 2020 Magnit started testing e-commerce services, both independently and in cooperation with partners.
