Sustainable Development

Our commitment to sustainability goes far beyond the topics that are of material significance for Magnit and its immediate stakeholders. As part of our ESG Strategy, we strive to contribute to all UN Sustainable Development Goals (SDGs), while also placing a particular emphasis on the following: Zero Hunger (SDG 2), Decent Work and Economic Growth (SDG 8), Responsible Consumption and Production (SDG 12), and Climate Action (SDG 13).

There is no doubt that it will take us some time to deliver on our strategic goals in the selected areas, but we take pride in the progress made against the Strategy and are happy to present the interim results achieved by Magnit’s sustainability team in 2021.

In the reporting year, we focused on programmes designed to promote healthy lifestyles, collection and processing of waste, and creation of a sustainable sourcing system. We also continued our efforts to reduce direct and indirect GHG emissions by buckling down to the renewal and gradual transformation of Magnit’s car fleet and boosting energy efficiency across the Company.

Our sustainability pursuits in 2021 helped Magnit improve its positions in a variety of ESG ratings. The Company’s ambition to become the best employer in the Russian retail sector was endorsed by the platinum award given by Forbes and KPMG to recognise Russia’s top employers in terms of their ESG record.

The Russian National Rating Agency called Magnit the leader of ESG integration among Russian non-financial public companies in retail, thus acknowledging our progress in corporate governance, assurance of product quality and safety, carbon footprint reduction, and development of staff relations.

With the acquisition of Dixy in 2021, Magnit experienced a major change in its corporate structure. We seek to fully integrate Magnit’s sustainability principles into the business processes of Dixy, while also fine-tuning the company’s current business practices.

Our ESG achievements would have been impossible without the concerted efforts of Magnit’s team, suppliers and partners. I would like to take this opportunity to thank each stakeholder for their significant contribution to Magnit’s sustainability efforts.

Despite all the accomplishments so far, we still have a lot of ambitious goals ahead. They are mostly about integrating ESG principles into all our business processes and operations.

Jan Dunning, Chairman of the Sustainability Steering Committee

Dear stakeholders,

As Russia’s No. 1 retailer by the number of stores and geographic outreach, we feel not only obliged to retain and strengthen our market leadership, but also responsible for the Company’s sustainable development and its contribution to sectoral and social sustainability. That is why our annual report focuses on the key results achieved by the Company as part of its ESG Strategy goals for 2025.

Striving to become a leading Russian retail in sustainability, Magnit has set ambitious goals that include leadership in the environmental impact reduction in the retail sector, having positive impact on the quality of life of the Russian consumers, becoming a number one employer in the industry, as well as creating a 100% responsible supply chain and the “Best in class” Corporate Governance.

As part of the ESG Strategy, we set out a variety of quantitative and qualitative targets in environmental stewardship, sustainable sourcing, employees, communities, and health and wellbeing.

The Russian National Rating Agency called Magnit the leader of ESG integration among Russian non-financial public companies in retail, thus acknowledging our progress in corporate governance, assurance of product quality and safety, carbon footprint reduction, and development of staff relations.

With the acquisition of Dixy in 2021, Magnit experienced a major change in its corporate structure. We seek to fully integrate Magnit’s sustainability principles into the business processes of Dixy, while also fine-tuning the company’s current business practices.

Despite all the accomplishments so far, we still have a lot of ambitious goals ahead. They are mostly about integrating ESG principles into all our business processes and operations.

Overview

In 2020, focused on issues that matter most to its stakeholders, Magnit set its sustainability strategy goals for 2025. Now in its second year, the Company has made considerable progress across its five priorities, fine-tuning its work to drive even greater improvements across environmental and social goals.

Magnit changed gears in 2021, growing significantly through a major acquisition, launching numerous stores and new formats, and building the e-commerce business. This was achieved against a continued backdrop of uncertainty around the COVID-19 pandemic and supporting customers and employees to a ‘return to normal’. At the heart of this is a strong commitment to grow the business sustainably and continue to reduce the Company’s impacts.

Key highlights for 2021

72% employee satisfaction

16% increase in purchases from local suppliers

99% of the total volume of plastic generated in the distribution centres is sent for recycling

19% reduction of specific GHG emissions (t CO2 eq/mln RUR) since 2019

8 thous. volunteers/events

27% of private label sales falls on healthy lifestyle products

8% decrease in specific electricity consumption (kWh/mln RUR) since 2019

RUB 641 mln allocated for social and charity projects

*The indicator is calculated based on the number of volunteers divided by the number of events, since it is currently not possible to calculate the absolute number of volunteers.

Interaction with stakeholders

While improving Magnit’s sustainability management and reporting, we consider the views of all stakeholder groups. We determine the most important issues to enhance communication and develop engagement with our stakeholders on these issues.

Magnit engages in an open dialogue with all stakeholder groups, both internal, such as employees and shareholders, and external, such as suppliers and customers. The Company’s interaction with stakeholders is built on the principles of respect for stakeholders, transparency, regularity, and compliance with obligations.

Read more about our stakeholder engagement on p. 112.
Sustainable Development (continued)

Environmental Stewardship
To be a Leader in environmental impact reduction in the industry

- CO₂ emissions
- Packaging waste
- Food waste
- Energy and water use

Private label (24.5% of the total number of SKU was checked):
- 25% of packaging is recyclable,
- 36% – partially recyclable

Own production: 30% of packaging is recyclable,
- 44% – partially recyclable

>99% of plastic packaging generated during shipping activities was recycled in 2021

Reduction by 46% of specific food waste generation (167.66 kg/mln RUR) since 2019

Reduction by 8% in specific electricity consumption (1,825.6 kWh/mln RUR) since 2019

Reduction by 19% (2.37 t CO₂ eq/mln RUR) of specific greenhouse gas emissions (scope 1 and 2) since 2019

Sustainable Sourcing
To strive towards a 100% responsible supply chain

- Products and raw materials from responsible sources
- Best local products
- Food and non-food safety
- Responsible own agriculture and production
- Private labels
